## Project Description

Leon County Department of Public Works is proposing to improve the facilities at the Crowder Landing Boat Ramp located in Leon County, Florida. The existing total site area is 0.58 acres and is located in Section 3, Township 1N, Range 1W. The existing address is 1053 Crowder Road.

## Proposed Improvements

The proposed repairs include the following:

- Replacement of two 35"x24" corrugated metal arch pipes that are failing with a hydraulically equivalent 3'x3' concrete box culvert.
- Replacement of a failing wooden retaining wall through which the pipes discharge into Lake Jackson with a steel sheet pile wall with cast-in-place (C-I-P) concrete cap.
- Replacement of a failing wooden retaining wall on the north side of the existing boat ramp with a concrete C-I-P gravity wall.
- Stabilizing the western shoulder of Crowder Road with asphalt pavement to reduce sediment load into Lake Jackson.
- Regrading and sodding the western side of the existing parking lot to provide greenspace for park users.
- Addition of a 12'x12' pre-engineered shelter adjacent to the boat ramp.
- Replace Boat Launch Ramp
