Project Description

On June 18, 2013, the Board adopted the Lake Jackson Huntington Sense of Place Initiative Report that specifically identified the need to provide for park facilities (picnic tables and grills, landscaping, etc.) at the boat landing by Lake Jackson (project idea 6.3.4).

On October 28, 2014, the PLACE (Planning, Land Management & Community Enhancement) staff presented a status report to the Board that included improvements to the Hwy 27 Boat Landing, being rebranded as Jackson View Boat Landing, as one of six projects that would be targeted for expending implementation funding of \$100,000 as allocated by the Board.

Proposed Improvements

- Parking and boat ramp.
- New dock structures
- New deck along with observation pier.
- New park signage
- New landscaping
- Precast restroom
- Picnic tables and grills
