Project Description

Replace existing system of corrugated metal pipes (CMP) with an equivalent system using concrete reinforced pipes (RCP) or concrete box culverts.

The system of ten (10) CMP's are showing signs of advanced deterioration of the metal pipe and concrete end protection resulting in increased maintenance and safety issues. The proposed culvert replacement with RCP pipes of concrete box culverts will insure a long lasting crossdrain system to this vital roadway.

Proposed Improvements

- Improved crossdrain system
- Stabilized shoulder at crossdrains
- Guardrail protection system
